DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 12, the recitation of the "upstream nozzle having a second geometry.....the downstream nozzle" is indefinite since it is the <u>second throat</u> having a second geometry different than the first geometry of the <u>first throat</u>.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-15 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 6, 33-36, 42 and 45-47 of U.S. Patent No.

Art Unit: 3752

6,764,030. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both claim a lance tube nozzle block for a sootblower comprising a nozzle block body, a downstream nozzle and an upstream nozzle. The claims in the instant application are broader in scope and are therefore, encompassed in the claims of U.S. Patent No. 6,764,030.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 6. Claims 1, 7, 8 and 14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by DE 137814.

DE 137814 shows a lance tube comprising all the featured elements of the instant invention.

7. Claims 1, 8, 14 and 15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shenker.

Shenker shows a lance tube comprising all the featured elements of the instant invention.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure. Hammond, Freund and Booher et al show various lance tube designs with opposed

outlets.
